# HODGE GROUP OF COMPANIES

For the last 15 years we've been predominantly machinery dealers, exporting and importing equipment throughout Europe.

Our experience and knowledge of today's challenging and demanding markets, allows us to offer our clients a service that is second to none.

At Hodge Plant we pride ourselves not only in the range, quality and age of our machines, but also in the experience, knowledge and skills of our staff and operators.

Alistair Hodge

Alistair Hodge Managing Director

## PLANT HIRE SINCE 1986...

- Hodge are one of the largest independent suppliers of large plant in Scotland, with over 30 years of experience supplying construction, mining, agricultural, horticultural, port, rail, waste and recycling sectors. As a company we are able to cater for both self-drive and operated plant within Scotland and Northern England, operating out of offices in Glasgow, Stirling and Nairn.
- Current plant fleet has in excess of 250 machines, from 1 ton rollers to 80 ton crushers, Hodge operates a service team of 8 dedicated fully trained fitters, all specialising in the specific equipment we provide. This in turn allows for a swift response to breakdowns, minimising down time and customer disruption, through the support of our parts department, who carry extensive spare parts for plant and equipment operated. At Hodge Plant we pride ourselves, not only in the range, quality and age of our machines, but also in the experience, knowledge and skills of our staff and operators. Hodge Plant can supply you with a wide range of plant with fully trained, competent and experienced operatives. We will actively seek the operator with the skills and knowledge to best under take the operational requirements of the hire.
- All our plant operators have reached CPCS / NPORS & MPQC certifications. We can assure punctuality and productivity are maintained throughout the hire period.
- All plant is rigorously checked pre and post hire, to make sure the equipment is maintained and tested to the PUWER, LOLLER standards required.
- All operatives will carry out the daily maintenance checks in line with current regulations and hire agreements.
- The company being sole distributors for a number of OEM providers for construction equipment, allows us the flexibility to give the client a greater range of equipment to choose from, enabling us to tailor plant to suit the needs of the operations.
- All Plant Hire is under the terms and conditions of the SPOA (Scottish Plant Operators Association.

# PLANT AND EQUIPMENT

# PLANT AND EQUIPMENT

Experts in providing safe on time transport, logistics and project management. We have an experienced inhouse team of professionals that understand the needs and expectations of our own projects and those of our clients.

This knowledge and experience underpin our expertise to overcome the hourly challenges involved in delivering on time, on budget and above all safely. Using the most modern tractor units and trailers your goods are hauled swiftly, accompanied with paperwork, permits and approvals to ensure a successful delivery.

We offer Nationwide coverage for the supply of plant and equipment, with the capacity to haul loads in excess of 80 tons accompanied by our escort services where necessary. Our GPS Tracking System, installed in all of our vehicles, ensures that the progress of your load is constantly monitored to ensure your schedule is always achieved.

## CONTRACTING SINCE 1986

Hodge Plant Ltd began as a general Plant hire company in 1986. Over the years the company has undertaken many challenging projects and accumulated skills, know-how and experience in the supply of plant and equipment to facilitate the largest of civil engineering and quarrying projects.

Our vision and mission, is to maintain professionalism within the industry, striving to deliver beyond the client's expectations. We aim to procure projects with competitive pricing, deliver safe working conditions and deliver quality workmanship within the required timeframes.

Our management team proactively gathers feedback from clients, identifying any changes within the company environment, to then review processes and communicate any issues, through regular meetings, to give the client confidence operations are being managed and under taken safely and efficiently. We have gained a wealth of experience through many years of delivering successful projects under unfavourable weather conditions.

We operate within our hire fleet a variety of plant and equipment both wheeled and tracked, with a large selection of attachments to suit the most challenging of activities. Due to the quality of equipment within our fleet, it has enabled us to acquire high calibre operator's, who are reliable and have worked for the company for numerous years. Operator reliability is invaluable as their effort has helped make Hodge Plant the company it is today.

### EARTHWORKS

The company has invested heavily in our plant fleet due to our involvement in the Plant Hire and Contracting sectors. Over the last decade we have had a heavy input in the renewable sector as well as ground remediation.

Although we now operate across a much broader range of activities, Bulk Earthworks and Plant Sales remain at the core of our business.

We can offer surveying solutions via our external surveying consultant who meets all our surveying & engineering requirements. Operating a conventional and fixed wing drones which collects all the relevant information, in much more detail than conventional surveying. Using aerial surveys this omits any risks and hazards associated to placing engineers in compromising locations. All data collected is processed using CAD and LSS, to provide volumetric information, for commercial returns and geotechnical designs.

Duneaton quarry was established in 2009, the mineral type is a Greywake of the Ordovician Formation. The characteristic of the mineral is grey in colour with rich quartz veins and can be high in iron.

The characteristics create a durable stone with a sound hardness which weathers little over time, due to the rich quartz veins this generates a high polished stone value (PSV) of 71% which is certified to BS EN13043 to comply with aggregate for asphalt.

We service a variety of sectors from private, civil engineering, house building, agriculture and we have seen an increase in requirement for single size products in the asphalt road surfacing.

#### Available aggregates:

0-5mm Rock Fines

4-6mm Single Size

6-10mm Single Size

10-14mm Single Size

14-20mm Single Size

40mm Single Size

75mm Single Size

Type 1 Mot Sub-base 0-40mm

Gabion Stone 100-250mm

Rock Armour

Type 3 Modified Type 1 8-64mm

Scalpings 0-40mm

PSV Value 68 - 71

### AGGREGATES

High (68/71) PSV aggregates available at Duneaton Quarry, Abington, loose or bagged.

## SERVICING AND REPAIRS

Hodge Plant Ltd has a very reputable reputation of servicing a wide range of construction equipment including and not limited to tracked and wheeled excavators, loading shovels, articulated dump trucks, dozers, graders, skid steer loaders and backhoe loaders.

Collectively Craig and his team have a vast amount of experience across various manufacturers machines. All of the team are specialist though when it comes to CASE machinery. All engineers have been through extensive training supplied by CASE. Our Service Manager has been working within this industry since 1988. Other members of his team also have been working within the industry for a number of years also which gives us a very strong competent Service Team.

We run a fleet of fully equipped mobile workshops and have a large fully equipped workshop facility at our head office to ensure that whatever the eventuality we will have your machine fully functional with the minimum amount of downtime.

### On-site servicing and breakdown repair

All our engineers are equipped to handle breakdowns, repairs or regular servicing on-site. If equipment cannot be repaired on-site we can supply alternative equipment.

### Workshop repairs, servicing and complete overhaul

We can handle any repair, from a simple oil change to a full rebuild and re-spray, including overhauls, hydraulic diagnostics and repairs, welding and fabrication.

At Hodge Plant Ltd we have a dedicated finance department, who can help structure finance solutions for all of your machinery requirements. Please feel free to contact Donald Stewart or Ken Lancaster (details below) to discuss.

Hodge Finance works in conjunction with selected finance houses and banks to tailor finance packages to suit your requirements.

We can meet to discuss your finance requirements at your place of business, or when you visit the Hodge Plant dealerships.
